### FJ Davey Home 2022 Quality Improvement Plan

FJ Davey Home 2022 Quality Improvement Plan									
	Measure								Change
Quality dimension	Measure/Indicator	Type	Unit / Population	Source / Period	Organization Id	FJ Davey Target	Target justification	External Collaborators	Planned improvement initiatives (Change Ideas)
Safe Care	Percentage of LTC residents without psychosis who were given antipsychotic medication in the 7 days preceding their resident assessment	P	% / LTC home residents	CIHI CCRS / July - September 2021	54497*	17.50%	CIHI data shows the Ontario 2020-21 rate to be 19.3% and the Canadian rate to be 22%		1. The FJ Davey home will be participating with the Extensicare Quality team to optimize the appropriate use of Antipsychotics. 2. The BSO Team will work closely with the Clinical Team and RAI team to optimize data collection, application of interventions, and supporting collaborative team work
	Percentage of long term care residents who have fallen in the last 30 days	C	% / LTC home residents	CIHI CCRS / Q2 July to September 2021	54497*	15%	CIHI data shows the Ontario and Canadian rate in 2020-21 to be 16.7%		1. The FJ Davey home will be participating with the Extensicare Quality team to reduce the number of falls overall 2. A focus on education for families and staff will focus on the correlation between respecting resident rights to choice, reducing restraints and falls
	Percentage of long-term care home residents in daily physical restraints over the last 7 days	C	% / LTC home residents	CIHI CCRS / Q2 July to September 2021	54497*	2.50%	CIHI data shows the Ontario 2020-2021 rate to be 2.8% and the Canadian rate to be 5.6%		1. The FJ Davey home will be participating with the Extensicare Quality team and Physiotherapy to ensure proper data collection on this metric and use of alternative measures 2. A focus on education for families and staff will focus on the correlation between respecting resident rights to choice, reducing restraints and falls

M = Mandatory (all cells must be completed) P = Priority (complete ONLY the comments cell if you are not working on this indicator) A= Additional (do not select if you are not working on this indicator) C = Custom (add any other indicators you are working on)

	Percentage of long-term care home residents who had a pressure ulcer that worsened to a stage 2, 3 or 4	C	% / LTC home residents	CIHI CCRS / Q2 July to September 2021	54497*	2%	CIHI data shows the ON 2020-21 rate to be 2.5% and the Canadian rate to be 2.7%		<ol style="list-style-type: none"> <li>1. The FJ Davey home will be participating with the Extencicare Quality team and Physiotherapy to optimize appropriate interventions</li> <li>2. A Strong multidisciplinary team with wound experts will continue to be built upon</li> </ol>
